

Flowserve Solenoid Valves

Namur, Remote and Banjo Mounted Designs for Precision Control

Experience In Motion

Flowserve® – Solutions to Keep You Flowing

Flowserve is one of the world's leading providers of fluid motion and control products and services. Globally, we produce engineered and industrial pumps, valves, seals, systems and automation equipment, and provide a range of related flow management services. Our solutions move even the most volatile and corrosive fluids safely and securely through some of the most extreme temperatures, terrain and challenging operating environments on the planet. Flowserve products and services are specified for use in a vast range of industries, including oil and gas, chemical, power generation and various general industries.

Flowserve Solenoid Valves

Flowserve offers a comprehensive suite of highly engineered valves, actuators, switchboxes, positioners and solenoid solutions that meet your exacting needs. Our solenoid valves allow reliable operation of pneumatically controlled valves and provide critical plant control in a variety of automated process industry applications. Solenoid valves are an essential part of any pneumatic actuated or control valve package offering remote operation, improved reliability and longer service life.

Available in a range of design configurations to meet specific application needs, Flowserve solenoid valves can be Namur (Direct) mounted onto compact actuators, Remote mounted for control valves and panels or screwed directly to the actuator air supply using a Banjo mounted design. Combined with a suitable coil to meet voltage and safety requirements, Flowserve solenoid valves ensure safe, reliable and precise actuator operation.

Key Benefits

- Reduced costs at the asset level through prolonged service life delivered by cost competitive Flowserve package solutions.
- Improved process integrity and safer working environment when used in combination with a comprehensive range of ATEX, IECEx, NEMA, FM and CSA certified solenoid coils. NEPSI and GOST approved products are available on request.
- Simplified and convenient procurement through availability of a comprehensive suite of Flowserve custom-engineered valves, actuators, switch boxes, positioners and solenoid valves.

ARF Series, 1/4", 3/2 or 5/2 way NAMUR Mounted Solenoid Valve

Description

Solenoid valve designed for direct mounting onto 1/4 turn pneumatically operated valve actuators meeting 'NAMUR' standard fixing dimensions. Hazardous area approved pilot operators, Ex nA, Ex mb, Ex db mb and Ex ia, NEMA 4X, NEMA 4X, 7C, 7D & 9 are available with various international approvals – ATEX, IECEx, FM, CSA.

Features

- Screwdriver override as standard
- Cv = 1.0
- Change-over plate that allows the valve to be converted from 3/2 to 5/2 function quickly and easily for spring return and double acting actuators
- In the 3/2 position, a feature of the valve allows a proportion of clean air exhausting from the actuator to be fed back into the spring chamber, Integrated Exhaust to Spring (ETS)

Valve Specifications

Port Connection Size	1/4"
Working Pressure	3 to 10 bar
Cv Factor	1.0
Flow Rate (at 6 bar with 1 bar pressure drop)	1000 l/min
Maximum Ambient Temperature	+80°C
Minimum Working Temperature	-20 °C

Materials of Construction

Body	Black Anodised Aluminium
Spool	Hard Anodised Aluminium PTFE Impregnated
Spacers	Glass Filled Acetal
Seals	Nitrile
Spring	Steel Alloy
Mounting Screws	Stainless Steel
Change Over Plate and End Caps	Nylon 66 30% Glass Filled
Gasket	Nitrile

 ** NEMA 4X, 7C, 7D and 9, frequency = 60 Hz

AEF Series, 1/4", 3/2 way Remote Mounted Solenoid Valve

Description

Aluminium 5 port 3 or 2 position, pilot operated solenoid valve. Hazardous area approved pilot operators, Ex nA, Ex mb, Ex db mb and Ex ia, NEMA 4X, NEMA 4X, 7C, 7D & 9 are available with various international approvals – ATEX, IECEx, FM, CSA.

Features

- External or internal pilot air connection
- Single coil spring return function or double coil stay put function
- Convenient fixing holes to enable bracket mounting
- Pilot exhaust dust caps fitted as standard
- Interchangeable CNOMO interface coil units, including hazardous area options and screw driver manual override as standard.
- SIL2 on energising, SIL3 on de-energising when used in 3/2 mode

Valve Specifications

Port Connection Size	1/4"
Working Pressure Internal Pilot Version	3 to 10 bar
Working Pressure External Pilot Version	3 to 10 bar
Cv Factor	1.2
Flow Rate (at 6 bar with 1 bar pressure drop)	1246 l/min

ADF Series, 1/8" & 1/4", 3/2 way Banjo Mounted Solenoid Valve

Description

Aluminium 3 port 2 position direct acting, compact solenoid valve designed for direct banjo bolt mounting onto 1/4 turn pneumatically operated valve actuators.

Features

- Convenient single 1/8" or 1/4" Banjo bolt connection
- Compact design to suit small actuators
- 1/4" BSP mains air connection and M5 exhaust
- Screwdriver manual override standard

Valve Specifications

Inlet Port Connection Size	1/4"
Outlet Port Connection Size	1/8" or 1/4" Banjo Bolt
Exhaust Port Connection Size	M5
Working Pressure	0 to 10 bar
Cv Factor	0.06
Flow Rate (at 6 bar with 1 bar pressure drop)	62 l/min
Maximum Ambient Temperature	+80 °C
Minimum Working Temperature	-20 °C

Materials of Construction

Flowserve Corporation has established industry leadership in the design and manufacture of its products. When properly selected, this Flowserve product is designed to perform its intended function safely during its useful life. However, the purchaser or user of Flowserve products should be aware that Flowserve products might be used in numerous applications under a wide variety of industrial service conditions. Although Flowserve can (and often does) provide general guidelines, it cannot provide specific data and warnings for all possible applications. The purchaser/user must therefore assume the ultimate responsibility for the proper sizing and selection, installation, operation, and maintenance of Flowserve products. The purchaser/user should read and understand the Installation Operation Maintenance (IOM) instructions included with the product, and train its employees and contractors in the safe use of Flowserve products in connection with the specific application.

While the information and specifications contained in this literature are believed to be accurate, they are supplied for informative purposes only and should not be considered certified or as a guarantee of satisfactory results by reliance thereon. Nothing contained herein is to be construed as a warranty or guarantee, express or implied, regarding any matter with respect to this product. Because Flowserve is continually improving and upgrading its product design, the specifications, dimensions and information contained herein are subject to change without notice. Should any question arise concerning these provisions, the purchaser/user should contact Flowserve Corporation at any one of its worldwide operations or offices.
