

MODEL 964

PNEUMATIC CONTROL VALVE

MODEL 964
Model C27 Actuator
(ATO-FC Action)

OVERVIEW

The Model 964 is a globe-style, pneumatic control valve for general plant utility services. The design incorporates characterized trim for most pressure, temperature, level or flow applications. Standard metal seat design gives Class IV shutoff; also available in TFE soft seat design for Class VI shutoff. Available in sizes 1/2" through 3" (DN 15 through DN 80).

FEATURES

- Quick change trim
- Equal percentage trim characterization
- Metal seat or TFE soft seat designs
- Optional stellite metal seating surfaces
- Standard stainless steel trim
- Full or reduced orifice trim
- Field reversible fail safe action
- Stem position indicator
- Standard Actuator compliant with IEG 60534-6-1 or mounting standardized positioners.

APPLICATIONS

General service utility fluids including air, water, industrial gases, and steam.

LINE SIZES AVAILABLE

1/2" (DN15), 3/4" (DN20), 1" (DN25), 1-1/2" (DN40), 2" (DN50), 3" (DN80)

END CONNECTIONS

NPT, FLANGED, SOCKET WELD

COMMON APPLICATIONS

AIR, WATER, INDUSTRIAL GASES, STEAM

DESIGN PRESSURE

BETWEEN 80 - 740 psig (5.5 - 51.1 Barg)

GENERAL SPECIFICATIONS

Body Sizes:	1/2"- 1", 1-1/2", 2", and 3". (DN15 - 25, 40, 50, and 80).	Actuator/Bench Setting:	Spring diaphragm type. Field reversible. See Table 3 for proper selection of required bench setting.
Seat Design:	Metal or TFE soft seat designs with full or reduced orifice, all sizes.	Painting:	<u>Standard</u> – All external non-stainless steel surfaces are coated with corrosion resistant epoxy paint per Cashco Spec #S-1606. Fasteners are zinc plated.
Seat Leakage:	Meets ANSI/FCI 70-2013. Standard – Metal seated, Class IV. Optional – TFE soft seated, Class VI, with metal-to-metal backup.	Gaskets:	<u>Standard</u> – Spiral wound SST with carbon filler.
Flow Direction:	<u>Standard:</u> Flow-To-Open (FTO); required to maintain flow characteristic.	Trim:	SST – See Table 6 for detailed material identification.
Rangeability:	See Table 9.	Packing Flange Bolting:	Type 18-8 SST studs and nuts.
Inherent Flow Characteristic:	Equal Percentage; FTO direction only.	Packing:	V-Ring TFE live loaded packing.
Flow Capacity:	Up to 90 Cv. See Table 9.	Miscellaneous Materials:	See Table 6.

ACTUATOR SUB-ASSEMBLY SPECIFICATIONS

Action:	<u>Air-To-Open, Fail Close.</u> Increase loading pressure pushes stem up, plug opens. <u>Air-To-Close, Fail Open.</u> Increase loading pressure pushes stem down, plug closes.	Ambient Temperature:	-50 to +180°F (-45 to +83°C). -20 to +140°F (-28 to +60°C) with electrical accessories.
----------------	---	-----------------------------	--

OPTION SPECIFICATIONS

Option-3:	<u>MANUAL HANDWHEEL.</u> Overrides the actuator spring force to allow manual stroking of valve. Single acting design, side-mounted. For <u>ATO-FC</u> action, handwheel operator "opens" the plug against spring force; may be utilized as a travel stop to prevent full closure. For <u>ATC-FQ</u> action, handwheel operator "closes" the plug against spring force; may be utilized as an "up" travel stop to prevent full opening. NOTE: <i>Not available with C110 Actuator.</i>	Option-15:	<u>STELLITED TRIM.</u> For metal seated trim design only. Plug and seat seating surfaces are Stellite #6 material. Recommended for flashing or partially cavitating liquid service, or where extended time periods of ON-OFF or low flow (less than 10% open) operation occur and Class IV shutoff is required.
Option-12:	<u>REDUCED ORIFICE.</u> For reducing the maximum flow rate or for handling higher pressure drops than the full port orifice.	Option-56:	<u>SPECIAL CLEANING.</u> Special cleaning per Cashco Specifications #S-1542. Suitable for fluids other than oxygen.

MOUNTED ACCESSORY SPECIFICATIONS

Positioners: ***NOTE:** PMV Positioners are not FM Approved at this time. If you need FM Approval, please specify the Siemens PS2.*

General: PMV Positioners. Aluminum housing with corrosion resistant powder coated epoxy. Pneumatic output load as required by actuator bench range. Field reversible action. Mounting dimensions per IEC 60534-6-1 Standard.

P/P Pneumatic. Model P5 features:

- SST cam with a simple cam locking device
- Tapped exhaust port for venting media
- External zero adjustment
- Input signal 3-15 psig
- Includes gauge ports, no gauges
- Analog only.
- Nitrile, NBR -4° to +185°F

I/P Electro-Pneumatic. Model D20 features:

- Digital or Hart compatible
- Single button self-calibration
- Input signal 4-20mA
- Optional gauge block with gauges for Models D20 D and D20 A.

Model D20 D is general purpose.

Model D20 A is Intrinsically safe, Ex ia ATEX.

Model D20 E is ATEX EEX d IIB+H₂, T6 FM Approved. - **Approval Pending** Gauge block is built in, no gauges. Not available with limit switch option.

Standard PMV setup offered by Cashco:

- Single Acting
- PMV, Black Cover with Arrow Indicator
- Standard Temperature: -4°F to 185°F (-20°C to 85°C)

Model D3 Digital, Hart, Profibus, or Fieldbus compatible. Input signal 4-20mA. Features large graphic display. Optional gauge block for Models D3 X and D3 I, no gauges.

Model D3 X is general purpose.

Model D3 I is Intrinsically safe, ATEX EEX ia IIC T4.

Model D3 E is ATEX EEX d IIB+H₂, T6 CSA CLS 1 DIV 1 Not available with limit switch option.

FM CLS 1 DIV 1 - **Approval Pending** Gauge block is built in, no gauges.

Standard PMV setup offered by Cashco:

- Single Acting
- PMV, Black Cover with Arrow Indicator
- No pressure sensors, NBR -40 to +80°C

Model PS2 is Digital, Hart, Fieldbus and Profibus compatible. Input signal 4-20mA. Features a Makrolon housing, (Aluminum for Explosion Proof.) Mounting dimensions per IEC 60534-6-1 Standard.

Model PS2-1 is general purpose.

Model PS2-2 is Intrinsically safe, ATEX Ex ia IIC T6/T4, FM CLS 1 DIV 1, CSA CLS 1 DIV 1, SIL 2

Model PS2-3 EX d IIC T6/T4, SIL 2 Not available with limit switch option.

Air Tubing:

Instrument air tubing SST with SST fittings.

Airset:

Model 5200P instrument air supply regulator. Use with positioners. Bracket mounted to actuator casing. Supplied with gauge. See technical bulletin 5200P-TB.

Solenoid Valve:

Standard Brass: Available in standard weather-proof model. Brass body, 1/4" female NPT connections. Nipple mounted to actuator casing. 120 VAC, 60 Hz power supply, CSA Approved Class 3221-01, NEMA 2,3,3S,4,4X. 8" HF utilizes a direct mount NAMUR mount style.

X-Proof or SST construction: Consult Factory.

Standard installation vents actuator and drives valve to fail-safe position upon loss of electrical power.

Consult factory for 230/1/50, or 120 VDC power supplies, or intrinsically safe (IS) service.

Transducers:

FM, CSA approved NEMA 4X CI 1, Div 1 and CI 1, Div 2.

Other Accessories:

764 P/PD pressure controller. Lockup valve. Position transmitter.

Limit Switches:

Model D20 and D3 positioners, switches are available, unit is enclosed in the positioner housing.

Limit and proximity switch options not available on Explosion proof rated positioners.

**METAL SEAT
ATC-FO ACTION**

**SOFT SEAT
ATO-FC ACTION**

- 1) CF = Consult Factory where differential pressures are below 50 psid preventing seat leakage evaluation per Cashco S-1597 at 50 psid.
- 2) Excessive differential pressures have been derated to a maximum of 740 psid (51.0 barg) corresponding with WCB body material with NPT or Class 300 flanged end connections at ambient conditions. Further derating may be necessary based on valve body pressure/temperature ratings.
- 3) ATC-FO values for 5-15 psig bench range based on maximum 20 psig (1.4 barg) supply pressure with use of a positioner.
ATC-FO values for 15-60 psig bench range based on maximum 75 psig (5.2 barg) supply pressure with use of a positioner.
