

ISO Registered Company

RANGER QCT

ECCENTRIC PLUG ROTARY CONTROL VALVE (ROTARY GLOBE)

RANGER QCT
WITH SIEMENS POSITIONER

OVERVIEW

The Ranger QCT is a control valve with a pneumatic spring-diaphragm actuator. It can be supplied with either a flanged or flangeless body style.

This rotary design provides excellent service life in a wide range of applications. Its most unique design feature centers around its **Quick Change Trim – QCT**. This concept provides front access to the valve body, allowing use of various lo-noise inserts, abrasion sleeve or alternate front-end seal retainers. Also, combinations of these features can be utilized to meet specific application needs.

The Ranger is the most user friendly control valve in the marketplace when it comes to maintenance. It takes a mere five minutes to change trim when out of the pipeline and requires no recalibration.

FEATURES

The Ranger has many important features that provide users with a cost-effective control valve:

- 1" – 8" (DN25 – 200)
- ANSI 150/300/600# pressure class capability with **flangeless** body-style
- ANSI 150/300/600# pressure class capability for **flanged** body-style in 1"-3" sizes; 150/300# for 4"-8" sizes
- Four body materials
- Ten trim combinations
- Dual seal rings - soft (Class VI) and metal (Class IV)
- Standard live-loaded packing
- Ease of maintenance
- Multiple reduced port configurations
- Cavitation trim
- Lo-noise trim
- Abrasion sleeve
- High capacity
- Multi-spring actuator.

APPLICATIONS

The Ranger is a universal control valve that is applicable in most control valve applications, especially steam. It provides longer life on difficult services where conventional ball or globe control valves have problems with body or trim wear. It provides noise control for gaseous service, and cavitation and flashing control for liquid service. It is able to withstand temporary distortions due to "thermal shock" without compromising continued control of the process.

LINE SIZES AVAILABLE

1" (DN25), 1-1/2" (DN40), 2" (DN50), 3" (DN80), 4" (DN100), 6" (DN150), 8" (DN200)

END CONNECTIONS

FLANGED, FLANGELESS

COMMON APPLICATIONS

STEAM, GASEOUS SERVICE, CAVITATION & FLASHING CONTROL FOR LIQUID SERVICE

DESIGN PRESSURE

MAXIMUM PRESSURE:
UP TO 1480 psig (102.1 Barg)

BODY SUB-ASSEMBLY SPECIFICATIONS

Body Sizes: 1", 1-1/2", 2", 3", 4", 6" and 8".
(DN25, 40, 50, 80, 100, 150, 200.)

Trim: See Table A below for trim materials determined by body materials or option number.
See Tables 3 and 3A for trim designation numbers and material specifications.

Body Materials Pressure/ Temperature Ratings: DI – ASTM A395.
CS – ASTM A216, Gr. WCB.
SST – ASTM A351, Gr. CF8M.
HC – ASTM A494, Gr. CW-12MW
See Table 1A - 1D for material specifications.

TABLE A – PARTIAL TRIM MATERIALS							
Body Size	Option	Body	Port	Seal Retainer	Cage	Plug Bearings	
1", 1-1/2", 2", 3" (DN25, 40, 50, 80)	None	DI, CS	All	316 SST	Cast 316 SST	Nitronic 60	
		SST	All	316 SST			
		HC	All	HC			HC
4" (DN100)		DI, CS	Full	CS	Cast 410 SST	Nitronic 60	
		DI, CS	Reduced, AC, LN	316 SST			Cast 410 SST
		SST	All	316 SST	Cast 316 SST		
		HC	All	HC	HC		Ultimet
6" & 8" (DN150, 200)		DI *, CS	Full	CS	Cast 316 SST	Nitronic 60	
		DI *, CS	Reduced, AC, LN	316 SST			
	SST	All	316 SST				
	HC	All	HC	HC	Ultimet		
1", 1-1/2", 2", 3" (DN25, 40, 50, 80)	Opt-40	CS, SST	All	316 SST	Cast 316 SST	Nitronic 60	
4", 6", 8" (DN100, 150, 200)		CS	Full	CS			
			Reduced, AC, LN	316 SST			
		SST	All	316 SST			

* 8" HF Ductile Iron Material is Not Available.

Eccentric Plug: Base material as indicated in Table 3 and footnote.

Stem

Sub-Assembly: Work-hardened 316 SST pin joining "groove" end to stem for 17-4PH stem; Nitronic 50HS for Nitronic stem; Alloy-25 for Alloy-25 stem.

Optional: Flexible graphite die-formed into lower density, interlocking rings, with higher density adapter rings, and top/bottom braided graphite filament rings.

Retainer Sleeve Sub-Assembly: As indicated in Table 3; insert material is non-removeable.

Soft Seal Ring: TFE: Glass-filled or Carbon-filled.

All Inserts: 316 SST or Hastelloy-C

Retainer Screw: 316 SST or Monel

Seal Retainer Screws: 18-8 SST or Hastelloy C cap screw.

Yoke: 1", 1-1/2", 2", 8" HF – CS rectangular steel tubing.
3", 4", 6", 8" LF – Ductile iron.

Flange Surface Finish: 250/125 micro-inch R_a (equivalent to 250/125 AARRH). Suitable for use with spiral-wound metallic gaskets.

Yoke Bolting: Option - ISO 5211 Actuator Mount.
18-8 SST studs, cap screws and nuts.

Clamping Companion Flanges: Not supplied with valve unit. Use only steel, stainless steel or Hastelloy-C piping flanges; socket weld, slip-on, or weld-neck types; RF or FF.

Packing Assembly: Common Parts for "Live-Loading":
Retainer & Spacer – 316 SST
Belleville Spring Washers – SST
Packing Follower – 18-8 SST
Packing Flange – 18-8 SST
Studs, Nuts & Washers – 18-8 SST
Follower Bushing Bearing – TFE.
Standard: TFE V-rings and adapters; non-split.

Per ANSI B16.5 Dimensions: All sizes of CS, SST, HC or DI body material; 150# or 300# flange pressure class. All sizes of CS, SST or HC body material; 600# flange pressure class except 6".
Per DIN Dimensions: May be installed between PN40 flanges in sizes DN25 - DN50.

Body Face-to-Face Dimensions: Per ISA – 75.08.02 for flangeless control valves. See Figure 11, dimension “E”. Integral flanged units meet the same dimensions.

Minimum Body Pressure: Standard Construction:
P = Ambient ≈ 0 psig (0 Barg).
Opt -38V Packing @ Vacuum:
P = Full Vacuum = 0 psia (0 Bara).

Flow Direction: Standard & Reverse flows.

Field reversible sizes 1" through 4" (DN25–100); sizes 6" & 8" (DN150 & 200) require replacement of metal seal ring.

Seal Retainer		Flow Direction
Full or Reduced Port		Both
Anti-Cav - AC		Reverse Flow
Lo-Noise	LNA, LNB	Both

Seat Design: Standard – Standard flow direction.
Dual seal rings; composition soft seal with metallic backup seal. Inlet pressure assists sealing.

Optional – Reverse flow direction.
Inlet pressure does not assist sealing. Reverse flow may increase seat leakage.

Seat Leakage: Per ANSI/FCI 70-2 @ $\Delta P_{min} \geq 50$ psi (3.45 Bar).

Rangeability: Function of seal retainer and lo-noise trim.

Seal Retainer	Seal Ret. Only	Seal Ret. + LN Insert
Full Port	125:1	80:1
0.6 Reduced Port	75:1	50:1
0.4 Reduced Port	50:1	35:1
0.2 Reduced Port	25:1	15:1
Anti-Cav - AC1,AC2	20:1	N/A
Lo-Noise - LNA,LNC	80:1	30:1
Lo-Noise - LNB,LND	60:1	25:1

Plug Travel: 1" thru 8" LF – 0°-to-90° rotation.
8" HF 0°-to-95° rotation.

Plug & Stem Torque Limits:

Designed Max Torque (Ft/lbs) for Plug to Stem Connection				
Current Trims	ST1, ST2, ST7	ST6, ST8, CT1, CT2	HT1, HT2, HT7	
Plug Material	17-4 PH SST	Stellite #6	Monel	
SIZE	1"	45	35	25
	1.5"	55	45	30
	2"	55	45	30
	3"	255	195	140
	4"	440	340	240
	6"	600	460	329
	8" LF	600	460	329
	8" HF	1485	1150	810

Cv Capacity: Function of seal retainer and internal lo-noise trim. See Tables 6 through 9.

Body Size		Max Cv	Max Kv
inch	(DN)		
1"	(25)	14	12
1-1/2"	(30)	25	21
2"	(50)	71	61
3"	(80)	170	146
4"	(100)	325	280
6"	(150)	710	612
8" LF	(200)	710	612
8" HF	(200)	1260	1086

NOTE: Kv = Cv/1.16; Kv is metric flow coefficient.

Stem Packing: Standard: Patented “live-loaded” V-ring packing using Belleville spring washers (see Fig.1); body with integral extended bonnet. Temperature Range $-325^{\circ} \leq T \leq 750^{\circ}F$ ($-198^{\circ} \leq T \leq 400^{\circ}C$), with exposed, uninsulated bonnet above $400^{\circ}F$ ($205^{\circ}C$).

Opt-38 HT: For high temperature service; live-loaded, solid ring packing. Temperature range $-20^{\circ} \leq T \leq 750^{\circ}F$ ($-29^{\circ} \leq T \leq 400^{\circ}C$), with insulated bonnet.

Opt-38V: For continuous vacuum service; same as standard, except V-rings are inverted.

Gasket: Standard – 316L SST formed chevron cross section, spirally wound type, flexible graphite filled.

Painting: Standard – All non corrosion resistant portions to be painted with corrosion resistant epoxy paint per Cashco Spec #S-1606.

FIGURE 1:
Ranger Body Sub-Assembly Cutaways

1" - 8" LF ACTUATOR TECHNICAL SPECIFICATIONS

Basic Design: 0–90° Rotary. Spring-diaphragm type. Rolling diaphragm with multiple springs. Enclosed linkage. Field-reversible for “direct” or “reverse” action (see Figure 2). Standard with manual handwheel operator.

Action	Model No.	Body Size		Bench Setting Range	
		in	(DN)	psig	(Barg)
Direct; ATC-FO (Increase in air “LOAD” rotates valve stem CW, closing valve)	48D-01	1", 1-1/2", 2"	(25, 40, 50)	5–15	(0.34–1.03)
	148D-01	3"	(80)	5–13	(0.34–0.90)
	148D-02	4", 6", 8"	(100, 150, 200)	10–26	(0.69 – 1.79)
Reverse; ATO-FC (Increase in air “LOAD” rotates valve stem CCW, opening valve)	48R-01	1", 1-1/2", 2"	(25, 40, 50)	5–15	(0.34–1.03)
	148R-01	3"	(80)	5–13	(0.34–0.90)
	148R-02	4", 6", 8"	(100, 150, 200)	10–26	(0.69 – 1.79)

ATC-FO = Air-to-Close, Fail Open;
ATO-FC = Air-to-Open, Fail Close.
NOTE: For special 5 - 13 psig bench set range for 4" size ONLY, contact the factory for special product code.

Size, Stroke & Volume:

Basic Model No.	Nominal Diaphragm Area in ² (cm ²)	Lever Arm Length in (mm)	Nominal Stroke * in (mm)	Volumes	
				Clearance in ³ (cm ³)	Volumetric in ³ (cm ³)
48D 48R	48in ² (310)	1.375 (34.9)	1.94 (49.3)	27in ³ (440)	87in ³ (1425)
148D 148R	148in ² (955)	1.875 (47.6)	2.65 (67.3)	90in ³ (1475)	372in ³ (6095)

* To generate 90° rotation.

Maximum Operating Supply Pressure:
48 D/R = 20 psig (1.38 Barg).
148 D/R = 36 psig (2.48 Barg).

Ambient Temperature Range:
-20° ≤ T_{amb} ≤ 180°F.
(-29° ≤ T_{amb} ≤ 83°C).

Air Connection: 1/4" female NPT.

Travel Stop Screw: Standard – Limits travel to 0°–90° rotational travel.

Figure 2:
Plug vs. Lever Arm vs. Actuator Orientation

1" - 8" LF ACTUATOR SUB-ASSEMBLY MATERIAL SPECIFICATIONS

Casting & Diaphragm Plate:	Cast aluminum; ASTM B108, Alloy 319.
Springs:	Epoxy coated steel.
Diaphragm:	Rolling-type; Buna-N with polyester fabric.
Handwheel:	Cast aluminum.
Arm Housing:	Cast iron.
Handwheel Stem:	316 SST.
Handwheel Gland:	Naval brass.
Locking Lever:	Plated malleable iron.
Threadseal:	18-8 SST with Buna-N insert.
Flange Bolting:	18-8 SST.
Turnbuckle Assembly:	Plated steel and SST.
Travel Stop Screw & Jam nut:	Plated steel.
Lever Arms:	SST with SST bolt and nut.
Cam/Spacer:	SST.
Nameplate:	SST.

Position Indicator Assembly with 73 P/P Positioner:

Plate – SST with high visibility red indicating zone displaying degree of valve “opening”.
Housing – 48D/R – aluminum;
148D/R – cast iron.
Lens – plastic.
Coverplate – SST.
External screws – SST.
Outboard stem bearing – steel ball bearing.

NOTE: With D3 and PS2 the position indicator is integral with positioner, and housing is cast iron.

Figure 3: Model 148R Actuator with 73 P/P Positioner with Manual Handwheel Operator

8" HF ACTUATOR TECHNICAL SPECIFICATIONS

Basic Design:	0–95° Rotary. Scotch Yoke Actuator Field-reversible for “direct” or “reverse” action.
Bench Range:	0-60 PSIG (0-4.14 Barg)
Maximum Operating Supply Pressure:	116 psig (8 Barg).
Ambient Temperature Range:	$-20^{\circ} \leq T_{amb} \leq 170^{\circ}\text{F}$. ($-29^{\circ} \leq T_{amb} \leq 76^{\circ}\text{C}$).
Air Connection:	1/4" female NPT.

8" HF ACTUATOR SUB-ASSEMBLY MATERIAL SPECIFICATIONS

Casting & Diaphragm Plate:	Extruded Aluminum
Springs:	SST
Piston:	Cast Aluminum
Seals	Buna-N
Cam/Spacer:	316 SST
Nameplate:	SST

OPTION SPECIFICATIONS

Option-3:	<p><u>NO MANUAL HANDWHEEL OPERATOR.</u> A handwheel and locking lever is supplied as standard for the Ranger except the 8" HF units. <u>This option covers supplying the unit with NO handwheel operator.</u></p> <p><u>Reverse Action; ATO-FC:</u> Actuator provided with adjusting screw assembly to assist for internal trim removal (see Figure 4).</p> <p>NOTE: Requires that actuator be pressurized to stroke the plug to near “closed” position, properly orienting tongue and groove connection to allow disengagement for trim removal.</p>
------------------	--

Option-7:	<p><u>LINE BOLTING.</u> For flangeless units only. See Figure 12 for required dimensions and installation clearances.</p> <p><u>Opt-7A:</u> Heat treated, alloy steel studs per ASTM A193, Gr. B7; carbon steel nuts per ASTM A194, Gr. 2H. Temperature Range: $-20^{\circ} \leq T \leq 750^{\circ}\text{F}$ ($-29^{\circ} \leq T \leq 400^{\circ}\text{C}$).</p> <p><u>Opt-7C:</u> Full cryogenic, corrosion resistant, 18-8 SST (316 SST) strain-hardened studs per ASTM A193, Gr. B8M; 18-8 SST nuts per ASTM A194, GR. 8M. Temperature Range: $-325^{\circ} \leq T \leq 750^{\circ}\text{F}$ ($-198^{\circ} \leq T \leq 400^{\circ}\text{C}$).</p>
------------------	--

Figure 4:
Option-3: No Manual Handwheel Operator - Casing Closure

Option-18: SLURRY TRIM. Includes a drilled and tapped (1/8" female NPT, with pipe plug) stem retainer screw to allow purge of neck (bonnet) area of valve body. Fluorocarbon elastomer O-ring impedes ingress of flowing solids into neck zone. Used primarily with saturated solutions that form hard, crusty buildup upon cooling, eventually causing stem "binding". Includes abrasion sleeve with body sizes 1-1/2" – 8". ST8 Trim only. ST8 Trim. Reverse Flow direction only. See Figure 5. Temperature Range: -20°F ≤ T ≤ 400°F (-29° ≤ T ≤ 205°C).

Figure 5: Option-18, Slurry Trim

Option-38HT: HI-TEMP PACKING. Standard TFE V-ring packing is replaced with live-loaded flexible graphite ribbon die-formed into interlocking rings with high density graphite adapters and top/bottom braided graphite filament rings. Primarily recommended for higher temperature service. Use of this optional packing REQUIRES USE OF A VALVE POSITIONER.

Option-38V: VACUUM PACKING. Same as standard V-ring packing, except V-rings are inverted (with respect to standard) to seal against air ingress. Orient valve "outlet" to be exposed to the highest vacuum level.

Option-40: NACE SERVICE: Apply only with CS or SST body materials. For sour gas or liquid applications. Specify only trim designation nos. CT1 & CT2. Meets National Association of Corrosion Engineering (NACE) materials standard #MR0175, for exposure of valve internals to fluids with sour gas (H₂S) present. Requires use of CF8M (cast 316 SST) cage and Nitronic 60 bearings in CS body sizes 4", 6" and 8" (DN100, 150, 200). Temperature range: -20° ≤ T ≤ 400°F (-29° ≤ T ≤ 205°C°).

Option-55: SPECIAL CLEANING. Cleaning per Cashco Spec. #S-1134. Only applicable for SST body material. Acceptable cleaning level for oxygen gas service. Use for non-cryogenic, oxygen service.

Option-56: SPECIAL CLEANING. Applicable for all body materials. Cleaning per Cashco Spec. #S-1542. Not suitable for oxygen service.

“QCT” – RELATED TRIM VARIATIONS

Anti-Cavitation Trim:

Anti-cavitation (AC) trim eliminates or reduces the level of cavitation present in clean liquid service. It locates any cavitation to a point where the valve body and internal trim are spared any damage effects. (Also effective in flashing services.) See Figure 6.

Only metal seated trims are available with the AC seal retainers.

The AC seal retainer design concept utilizes a network of 2-stage orifices to accomplish the following:

- Generate smaller vapor bubbles
- Locate the bubbles near the seal retainer
- Hasten downstream bubble implosion
- Direct flow to downstream pipe center
- Reduce noise
- Reduce vibration
- Reduce downstream pipe wall damage.

The AC seal retainer requires reverse flow direction. Seat leakage is maintained to Class IV or better. See Table 2 for pressure drop limitations for AC trim. See Table 8 for flow coefficients.

Figure 6:
Anti-Cavitation - AC Trim

Reduced Orifice Trim:

Three sizes of Reduced Orifice Trims are available for the Ranger QCT 1" - 8" LF units – 0.2, 0.4 and 0.6 Cv, and .3 and .5 for 8" HF units.

Reduced Orifice Trim is recommended to improve control loop resolution for control valve installations when a line sized valve is more economical than pipe reducers and smaller valves, or when future increases in capacity are planned. See Figure 7.

Reduced Orifice Trims utilize elongated openings to control the maximum Cv while maintaining the inherent flow characteristic of the standard trim.

Figure 7:
Reduced Orifice Trim

Lo-Noise Trim – LNA/LNB:

LNA/LNB are similar to the AC1/AC2 seal retainer, except that a soft seal can be installed and the intent is for gas service up to 400°F (205°C) or steam service up to 366°F (186°C). The AC1/AC2 seal retainer is not available in soft seal trims. See Figure 8.

LNB is supplied with fewer orifices than LNA. See Table 6 for flow coefficients. Inherent character remains linear. Applies to all sizes.

For saturated steam at pressures above 435 psig (30 Barg); because the steam “flashes” upon pressure drop, ONLY AC2 should be applied.

Figure 8:
Lo-Noise Trim – LNA/LNB

LNA and LNB are normally applied together with an LN2 through LN4 lo-noise insert; this combination can remove 12–20 dBA of noise.

**Lo-Noise Trim -
LN2 thru LN4:
Abrasion**

For gas or steam service only. Available for body sizes 1-1/2" – 8" (DN40 – 200) as an insert. Material is 316 SST.

LN2, LN3 and LN4 are similar except each varies in the number of orifices present. See Table 9 for flow coefficients.

LN2 is available for 1-1/2" – 8" (DN40 – 200) body sizes, and is normally applied together with an LNA or LNB seal retainer; this combination can remove 10–16 dBA of noise.

LN3 is available for sizes 3" – 8" LF (DN80 – 200), LN4 is available for sizes 4" – 8" LF (DN100 – 200). See Table 9 for flow coefficients.

Figure 9:
Lo-Noise Trim – LN2 thru LN4

Sleeve:

The abrasion sleeve (AS) prevents the impingement of solids on the back-end portion of the valve body wall. The standard cage protects the other most vulnerable portion of the valve body. Together these replaceable parts protect the Ranger body from the abrasive action of solids in the flowing fluid.

Figure 10:
Abrasion Sleeve

The abrasion sleeve is also recommended for cryogenic service where the body is exposed to sudden thermal shock; i.e. liquid slug.

Available in 316 SST for 1-1/2" – 8" (DN40 – 200) valves. Identified as Opt-AS. Figure 10.

TECHNICAL SPECIFICATIONS

¹ Use the "With Positioner" Max ΔP values for use in ON-OFF service.
² 3-15 psig (0.21-1.03 Barg) or 10-26 (0.69-1.79) SIG directly to actuator.
³ 1-17 psig (0.07-1.17 Barg) OUTPUT LOAD directly to actuator (no positioner); 4-20mA INPUT SIG. Tight shutoff may NOT be attained.
 * "AC" = "anti-cavitation" seal retainer.
 With a 3-15 psig (0.21-1.03 Barg) SIG, requires a 1:2 air supply booster.

** "Chem Trim" is defined as any trim that uses a Stellite #6 plug or a Nitronic 50HS Stem; includes trim designation nos. CT1 & CT2.
NOTES:
 1. The above pressure drops apply to the valve as a "unit", including all seal retainers and lo-noise inserts.
 2. When "Chem Trim" is applied with an AC seal retainer, the lower of the two "maximum pressure drop" values is to be the upper limit.

2. See Table 5 for C_v 's of LNA or LNB in std. flow direction with NO insert.

MOUNTED ACCESSORY SPECIFICATIONS

Positioners: ***NOTE:** PMV Positioners are not FM Approved at this time. If you need FM Approval, please specify the Siemens PS2.*

General. Mounted to arm housing. All feed-back linkage is enclosed and not exposed directly to elements.

P/P Pneumatic. Model 73. Adjustable zero only. Analog signal only. Includes gauge port, with gauge. Not Available on 8" HF.

General: PMV Positioners. Aluminum housing with corrosion resistant powder coated epoxy. Pneumatic output load as required by actuator bench range. Field reversible action. Mounting dimensions per IEC 60534-6-2 Standard.

P/P Pneumatic. Model P5 features SST cam with a simple cam locking device, tapped exhaust port for venting media, external zero adjustment. Input signal 3-15 psig, Includes gauge ports, no gauges. Analog only.

I/P Electro-Pneumatic. Model D20 is Digital and Hart compatible. Features single button self-calibration. input signal 4-20mA. Optional gauge block with gauges for Models D20 D and D20 A.

Model D20 D is general purpose.

Model D20 A is Intrinsically safe, Ex ia ATEX.

Model D20 E is ATEX EEX d IIB+H₂, T6 FM Approved. - **Approval Pending**
Gauge block is built in, no gauges. Not available with limit switch option.

I/P Electro-Pneumatic. Model D3 is Digital, Hart, Profibus, and Fieldbus compatible. Input signal 4-20mA. Features large graphic display. Optional gauge block for Models D3 X and D3 I, no gauges.

Model D3 X is general purpose.

Model D3 I is Intrinsically safe, ATEX EEX ia IIC T4.

Model D3 E is ATEX EEX d IIB+H₂, T6 CSA CLS 1 DIV 1 FM CLS 1 DIV 1 - **Approval Pending**
Gauge block is built in, no gauges. Not available with limit switch option.

Model PS2 is Digital, Hart, Fieldbus and Profibus compatible. Input signal 4-20mA. Features a Makrolon housing, (Aluminum for Explosion Proof.) Mounting dimensions per IEC 60534-6-2 Standard.

Model PS2-1 is general purpose.

Model PS2-2 is Intrinsically safe, ATEX Ex ia IIC T6/T4, FM CLS 1 DIV 1, CSA CLS 1 DIV 1, SIL 2

Model PS2-3 EX d IIC T6/T4, SIL 2. Not available with limit switch option.

All I/P positioners not available with 764's.

Air Tubing: Instrument air tubing SST with SST fittings.

Airset: Model 5200P instrument air supply regulator. Use with positioners. Bracket mounted to actuator casing. Supplied with gauge. See technical bulletin 5200P-TB.

Solenoid Valve: Standard Brass: Available in standard weather-proof model. Brass body, 1/4" female NPT connections. Nipple mounted to actuator casing. 120 VAC, 60 Hz power supply, CSA Approved Class 3221-01, NEMA 2,3,3S,4,4X. 8" HF utilizes a direct mount NAMUR mount style.

X-Proof or SST construction: Consult Factory.

Standard installation vents actuator and drives valve to fail-safe position upon loss of electrical power.

Consult factory for 230/1/50, or 120 VDC power supplies, or intrinsically safe (IS) service.

Transducers: FM, CSA approved NEMA 4X CI 1, Div 1 and CI 1, Div 2

Other Accessories: 764 P/PD pressure controller. Lockup valve. Position transmitter.

Limit Switches: Model-D20 and D3 positioners, switches are available, unit is enclosed in the positioner housing.

Limit and proximity switch options not available on Explosion proof rated positioners.
